Profile

Accomplished full-stack developer specializing in **MEAN, MERN** ecosystems, with proven expertise in delivering scalable, high-performance solutions for complex B2B marketplace applications. Proficient in **MongoDB, Express.js, Angular, React, Next.js, and Node.js**, with strong capabilities across both frontend and backend development. Adept at transforming complex requirements into intuitive, user-centric applications that enhance business efficiency, elevate user experience, and drive measurable growth.

Work Experience

Executive Software Engineer, Seebiz Pvt LTD

04/2022 – present | Lahore, Pakistan

Professional Summary:

- Collaborated as a key member of a 6-person team to develop an innovative Marketplace product.
- Quick learner and adaptable to new technologies and methodologies.
- Effective task management, optimizing team performance, and meeting project milestones.
- Developed multiple features, such as dynamic dashboards, real-time data visualizations on categories & product variations, add product, search, dynamic themes, data layer, memory management, and add-to-cart.
- Maintaining performance by implementing lazy loading for modules and optimizing data loading strategies for seamless user experience.
- Improved database performance through the design and implementation of various DB scripts.
- Led debugging efforts to ensure a smooth user experience by fixing software issues.
- Worked on CSR as well as SSR in SeeBiz marketplace.
- Designed and implemented Redis-based caching layers to reduce database load, ensuring faster response times and enhanced data retrieval speed for high-traffic applications.
- Crafted data handling algorithms that dynamically scale with Redis Elasticsearch, allowing applications to automatically adapt to growing data and user demands without compromising performance.
- Demonstrated strong problem-solving skills, consistently exceeding project goals, and mentoring trainees in mastering JavaScript and Web Development, improving their coding skills.

Education

Bachelors in Information Technology, University of Gujrat

09/2017 – 09/2021

Relevant course work: Data structures and algorithms, Linear algebra, Calculus, OOP, Algorithms designs, Databases, Web engineering, Software engineering, Operating system, Human Computer Interaction, Project Management.

Intermediate in ICS, Punjab College

06/2015 – 06/2017 | Wazirabad, Pakistan

Skills

html5 • css3 • bootstrap • Memory Management • JavaScript • PM2 • Angular • ReactJs • NextJs • Node JS • Mongo DB • Postman • Git, Git Bash • GitHub, BitBucket • NGINX • Problem Solving • Leadership • TypeScript • Communication • Redis • ElasticSearch • AWS(S3, Lamda, SQS)

Projects

Turtt Communities

08/2024 – Present

Technologies: MERN (MongoDB, Express.js, React, Node.js), Next.js, REST APIs

Description:

Built and maintained a scalable B2B marketplace that helps businesses connect, collaborate, and trade with ease. Developed core features like user management, product listings, real-time updates. i am currently worked on turtt marketplace and develop many features for this application.

SeeBiz

07/2022 – 08/2024

Technologies: Angular, Nodejs, Robo3T, Express

Description: SeeBiz is an online sales portal and networking platform that allows manufacturers, distributors, wholesalers and retailers to exchange goods and connect with each other at one place.

POS(point-of-sale)

05/2022 – 07/2022

Technologies: Angular, Nodejs, MongoDB

Description:

Led a dedicated team of four in developing an advanced Point of Sale (POS) system. Oversaw the entire project from start to finish, ensuring smooth collaboration and resource management. Our collective expertise and passion for innovation are evident in the successful POS system we created.

- The project's remarkable success led to its adoption as a valuable training platform for interns and trainees. Its comprehensive structure allowed emerging talents to enhance their frontend and backend skills effectively. The POS project's influence goes beyond its primary function, serving as a valuable learning resource for future industry professionals.

World News, Practice project

Technologies: React js, Html, Css, Bootstrap

Description:

Monkey News is a web based application where you can search and read news according to your inerest and according to your country.

Smart Health Prediction(Capstone)

Technologies: VS, SQL Server, .NET, C#, HTML&CSS, Bootstap, Web Forms

Description:

SHP is a web base application where people can predict their diseases by adding their symptoms, doctor is suggest according to the patient disease, patient can buy medicine, see health news, realtime chat.
